CAREER OBJECTIVE

Java Full Stack Developer with a strong foundation in building scalable, high-performance web applications using the Spring Boot and React ecosystem. Proven expertise in designing RESTful APIs, managing persistent data with Hibernate/JPA, and deploying cloud-native solutions on AWS. Passionate about leveraging Java 8+ features to write clean, maintainable code and contributing to agile teams to solve

TECHNICAL SKILLS

- **Backend:** Java (Core & Advanced, Java 8+), Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JDBC, Servlets, REST APIs.
- **Frontend:** React, JavaScript (ES6+), HTML5, CSS3, Bootstrap.
- **Database:** MySQL, Oracle SQL.
- **Cloud & DevOps:** AWS (EC2, S3, IAM, EBS, ELB, Route53, Lambda, Elastic Beanstalk), Maven, Git.
- **Developer Tools:** Postman, Eclipse, VS Code.

PROJECTS

- **Employee management system.**
 - Architected a full-stack system using Spring Boot and React, leveraging REST APIs and Axios to ensure high-speed, seamless client-server communication.
 - Implemented Spring Data JPA for optimized database mapping and built a responsive UI with React Hooks, reducing boilerplate code while enhancing real-time user experience.
- **Online Shopping Website Using API.**
 - Developed a dynamic E-commerce platform integrated with FakeStoreAPI for real-time product data fetching, featuring seamless browsing and cart management.
 - Leveraged React and Axios to handle asynchronous API requests, ensuring responsive UI updates and efficient state management for a high-performance shopping experience.
- **Online Tutorial Management System (Spring Boot + React)**
 - Architected a full-stack Tutorial Management System using Spring Boot and React, featuring RESTful APIs for course lifecycle management and secure user authentication.
 - Implemented seamless video content delivery and a responsive UI with React Hooks, ensuring a high-performance and scalable learning experience for end-users
- **AWS Cloud Infrastructure & Deployment**
 - Engineered scalable cloud solutions including Blue-Green deployments via Elastic Beanstalk for zero-downtime updates, S3 Static Hosting with CORS for optimized web delivery, and AWS EFS for high-performance shared file storage.
- **Note Application (Spring Boot + React)**
- **Online Movie Application**
